
Principal Distribution Certificates

INTRODUCTION

Principal distribution certificates offer credit unions a new way to market savings products to members with higher balances. With principal distributions, members receive periodic income in the form of checks or transfers during the term of the certificate. Members looking for a way to incrementally receive funds from their accounts will appreciate this service.

Credit unions offer this option by configuring Certificate Types that are designed to offer the principal distribution feature. (You can select to require or make it optional in the configuration.) Then when a certificate of this Type is opened, the MSR simply enters the principal distribution amount and whether the member wants to receive funds in the form of a check or as a transfer to a different sub account. Principal distribution funds are disbursed separately from dividend payments so members even have the option of disbursing the funds using different methods. For example, the member could transfer their dividend payments to another (checking) account and send the principal distribution disbursement in the form of a check to their broker.

CERTIFICATE PROCESSING

Principal distribution processing occurs during dividend processing, with the posting of principal distributions (Tran Code 43, Tran Type 38) directly following the payment of dividends (Tran Code 43, Tran Type 39).

When a certificate is opened, its default “Principal distribution method” will default to the “default renewal code” of the Certificate Type. Only disbursement methods of *Check* or *Transfer to* are allowed as disbursement methods for principal distributions – this indicates how the funds will be disbursed to the member. If the “Principal distribution method” of *Transfer to* is selected, a transfer account must be entered. (This account is indicated by the *Trnsr/rdmpt/prin dist acct* field in the Account Update screen.)

- Dividend disbursements on the other hand are processed according to a separate dividend disbursement code and are transferred to a separate dividend transfer account.

If dividends and principal distributions are both disbursed by check, they are mailed as separate checks. Both checks are mailed to the default address of the membership, the primary owner’s address. The *Pay To:* address can be changed when opening the Certificate or in the Member Account Update; however, both dividend and principal distribution checks are sent to the same address. (If a dividend check is set to be mailed to an alternate address, a principal distribution check will automatically also be sent there as well.) When ***Print Auto/Mail Check Audit List*** on the Member Communication (MNPRTC) menu is used to select the checks to be printed, the “Certificate dividend check” checkbox also controls the selection of the principal distribution checks. Once this option is selected, ***Print Auto/Mail Checks*** on the Member Communication (MNPRTC) menu then prints both types of checks.

Upon maturity, any funds remaining in a principal distribution certificate that have not been disbursed will be paid in a final lump sum disbursement, via check or transfer (according to the default renewal code of the certificate). This check is also sent to the primary address on the membership (or other Pay To: address if indicated by the certificate).

There are some instances where principal distributions will not be disbursed. If at any time there is not enough money in the certificate to make the principal distribution disbursement, the funds will remain in the certificate and an exception will be printed to the Exception report. Additionally, if the certificate’s funds are frozen for withdrawals (freeze codes 1 and 3), principal distributions will not be posted, but will also appear on the Exception report. Refer to page 11 for an example of the Exception report.

It is not recommended that a certificate with a principal distribution also be used to secured loan or any other account. Principal distributions will continue as usual, however, as long as the distribution is over and above the secured amount. In rare cases where dispersing the principal distribution would take the secured funds negative, the principal distribution will not be dispensed and will appear in the exception report mentioned in the previous paragraph.

NOTE ON ONLINE BANKING

Certificate products with principal distributions are not supported at this time via **It's Me 247**. There is no way to disclose special details pertinent to this sort of account online, and there is no place for the member to indicate a principal disbursement amount. It is not recommended that credits union offers these products on online rate boards, or that they allow members to open this type of certificate online.

CONFIGURATION CONSIDERATIONS

Whether a certificate allows for the principal distribution feature is dependent on its Certificate Type configuration.

The *Allow principal distribution* selection at the top of the Certificate Type configuration screen determines whether principal distributions are required, allowed, or blocked.

There are three options:

- *Allowed (A)* – When the certificate is opened, the MSR has the option of setting up a principal distribution or not. The feature is allowed but is not required. This might be used if the credit union wants to use an existing Certificate Type for its members wanting this service. (In this case, it is recommended that the default renewal code for the Type be “Transfer to” or “Check” for this Type to function correctly when opening a certificate with a principal distribution.)
- *Required (R)* – All certificates created with this Type will require the entry of a principal distribution amount. Credit unions may choose to create specific Certificate Types configured in this manner for use only with their principal distribution offering.
- *Blocked (N)* – This is the default for all Certificate Types. Principal distributions are not allowed for certificates created with this Type.

CERTIFICATE TYPE DEFAULT RENEWAL CODE

At certificate open, the default renewal code of the Certificate Type is used as the default for the principal distribution disbursement method. The default renewal code of the Type is also used to determine how to handle the payment of funds remaining in the account at the end of its term. Therefore, Types designed for use with principal distributions should have a renewal code of either *Transfer to* or *Check*. Additionally, always be sure to uncheck the box in the Certificate Type configuration that allows members to change the renewal code online.

Certificate Type Configuration

This selection determines if principal distributions are allowed, required, or not allowed. Here *Required* is selected.

Certificate Types for principal distributions should have a *Default renewal code* of either *Transfer to* or *Check* to function correctly at certificate open.

Members must not be allowed to change the Renewal Code online. This box must be unchecked for Types allowing or requiring distributions

OPENING A CERTIFICATE

CERTIFICATE TYPES REQUIRING PRINCIPAL DISTRIBUTIONS

If the Certificate Type “Requires” principal distributions, the corresponding fields will appear automatically in the *Should the Member Receive a Principal Distribution* section. The Principal disbursement method is flooded with the default renewal code of the Certificate Type. In the example above, this was Transfer; however, “Check” could also be selected at this time. If the Transfer is selected, the Transfer account must be entered. In all cases, the principal distribution amount must be entered. This is not system generated; the credit union enters an amount based on its own policy.

Certificate Open – Principal Distributions Required

Create/Open New Certificate

Account # CD type 03 6 MONTH CERTIFICATE MARY M MEMBER
CD amount 500.00 123 MAIN STREET
Issue date Dec 12, 2013 Maturity date Jun 12, 2014 [MMDDYY] ANVCITY MI 49000
 Joint owner/beneficiaries

How Should the Dividends be Paid?

Dividend disburse code Addback
Dividend payment/transaction frequency Monthly
Dividend rate 0.050 %
Dividend variable rate code

Should the Member Receive a Principal Distribution?

Yes, the member should receive a principal distribution (required)
Principal amount to be distributed to the member each dividend payment period 196.22
Principal distribution method Transfer Principal distribution account

i Upon maturity, certificate will make one final principal distribution as instructed above and close.

Post Skip Procedures Pay to

FR (1511) 12/12/13

This Certificate Product's default renewal code is Transfer. A MSR could change this to Check, the only other available option. Since Transfer is selected, the MSR must enter the transfer account.

NOTE ON CHANGING THE PAY TO: ADDRESS FOR CHECK DISBURSEMENT

If “Check” is selected as the disbursement method, the check will be sent to the address of the Primary member on the membership – unless the Pay To: address has already been changed, for example, to send a dividend check to an alternate address. (Both dividend and principal distribution checks are mailed to the same address.) To change the Pay To: address use F22-Pay To from the screen shown above and change the address to the desired address. This address change can also be made on the Account Update screen.

- By changing this address, the member could select to send their principal distribution payments to a broker or other person.

Jt Owner/Beneficiary Checklist Div Check Pay to

wU [2451] 3/21/16

The certificate distribution amount or distribution account is updated here.

Changes to the principal distribution fields in Update require Tier 2 Security (as shown above).

As mentioned earlier, principal distribution checks are mailed to the same address as dividend checks. This Pay To: address is by default to the primary address on the account. By clicking the Set Div Checks Pay To/Address button, a credit union employee can change the Pay To: address for checks that are distributed by principal distribution

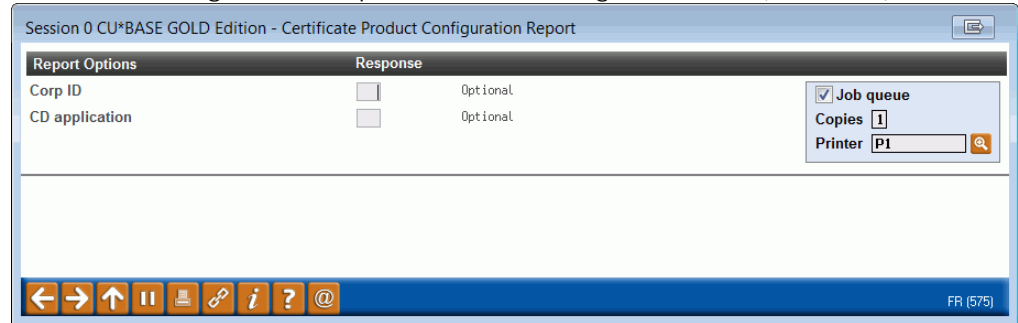

- NOTE: This address is also used for the distribution of dividend payment checks.
