

Please note - This form must be completed and returned in its entirety to ensure your order is configured and delivered properly.

- Failing to do so may result in units being delivered with basic configurations.
- (You will be informed prior to shipment if we cannot meet any of the requirements documented on this questionnaire).

| Vorkst | ation Configuration –   |                       |                     |                                       |         |  |  |  |
|--------|---|-----------------------|---------------------|---------------------------------------|---------|--|--|--|
| 1.     | Time Zone (ex. EST): _  |                       |                     |                                       |         |  |  |  |
| 2.     | Computer Name:  |                       |                     |                                       |         |  |  |  |
|        | ☐ Default Dell service tag  |                       |                     |                                       |         |  |  |  |
|        | Other, please specify:  |                       |                     |                                       |         |  |  |  |
|        | **Note: Units cannot have the same name on the same network. Please keep this in mind (especially when replacing units)       |                       |                     |                                       |         |  |  |  |
| 3.     | IP Address Information: (If you are unsure and a managed client, CNS can assist)  |                       |                     |                                       |         |  |  |  |
|        | □ DHCP (Automatic IP address assignment)  |                       |                     |                                       |         |  |  |  |
|        | ☐ Static, please provide the following (Manually set):  |                       |                     |                                       |         |  |  |  |
|        | o IP address:   |                       |                     |                                       |         |  |  |  |
|        | o Subnet:   |                       |                     |                                       |         |  |  |  |
|        | o Gateway:  |                       |                     |                                       |         |  |  |  |
